4

Cost of implementation

Cost of implementation

- Car purchase 153 000 PLN gross (33 794 Euro gross)
- The service of providing a comprehensive IT solution for the automatic number plates registration of vehicles parked in the paid parking zone. (implementation of the system + provision of services)
 - 36 000 PLN gross/month (7 952 Euro gross/month)

5

Description of the solution

All the parking spots where fees are charged have been inventoried and have their GPS coordinates, are entered in the QGIS program.

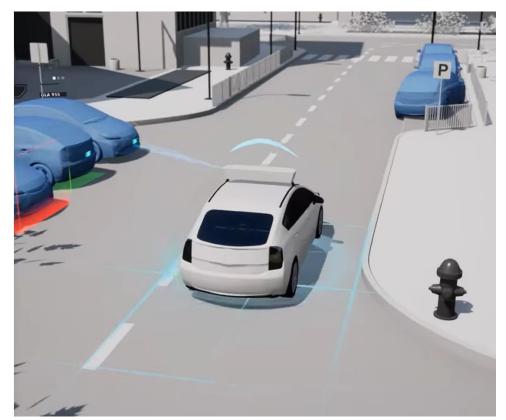

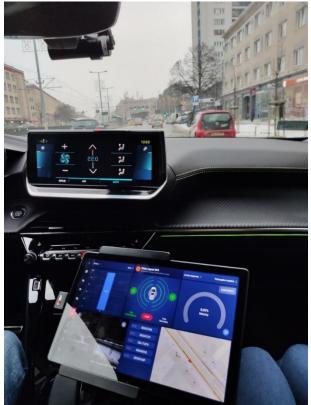

The inspection consists of a double scan within a few minutes, checking the car parked in the same place.

It is so to exclude those cars whose drivers just arrived and are still clicking on the application, or have just gone to pay at the parking meter.
